

Best Value Purchasing

Best value procurement should take into account:- Quality, Reliability, Guarantees, Expected life of the product, how long a product can be supported (parts available) and finally price.

Bamford Doors tick all the boxes:-

- Bamford Doors have been supplying products and solutions to the public sector for over 35 years, many of our products have been tested on OJEU frameworks – providing guaranteed independently quality tested products with recognised BEST Value Procurement.
- Bamford Doors are competitively priced.
- Bamford doors offer a lifetime guarantee on all Bamford manufactured products. Buy once – engineered for life. 100% cost saving based on a complete replacement after 4-10 years due to using inferior doors to Bamfords.
- The Bamford range of products are totally bespoke – designed and manufactured to your needs, using our in house design team, as opposed to some Company's who buy in ready made section.
- Our design to our knowledge is the only design in the UK which uses recessed doors, glazing and panels, removing flanged faces which are subject to jemmy attack.
- The section design is unique to Bamfords, which we have developed over the last 30 years. This unique section gives superior strength and longevity when compared to inferior products.
- Using aluminium is 100% recyclable. Timber used is sourced from CFC accredited suppliers.
- All of the products in the Bamford range are designed, hand built in Britain and spares are available for up to 20 years, which all adds up to a quality product. In fact we are still supporting Doors installed over 20 years ago.
- Bamford Doors are specified by around 150 housing associations, councils and consultants throughout the UK because we offer 'best value'
- Bamford Doors offer a full service to you, our client from first site visits through to site surveys of your housing stock/development, the writing of technical specifications, thus ensuring you end up with the correct product, professionally installed. All our installation teams are employed direct, we do not use sub-contractors, enabling us to provide a quality installation. All employees are CRB Checked and hold CSCS cards.
- Bamford Doors are part of the Bamford Group of Companies who have been designing engineering products in Stockport for over 108 years.
- We are ISO, Chas, Constructionline and Pas 23 & 24 accredited.
