

### **Overview**

The Bamford *Modular Door*, a visually appealing security door, which provides excellent resistance against vandalism and forced entry.

Constructed using our exclusive heavy duty, hardened aluminium section, it can be designed to give a wide choice of door style to suit virtually any application.

The smart design is more appealing to those customers who require something less 'industrial' but still require strength.

### **Specification and Advantages**

Manufactured using the same engineering techniques as our standard range, the aluminium modular door offers the following:-

- Variety of different designs which can be fully DDA compliant including porches, bespoke screens etc.
- Can incorporate virtually any mechanical or electromagnetic locking system and door entry systems.
- The door leaf is re-baited into the centre of the frame and hung on a continuous piano hinge.
- Can accommodate either a surface mounted or concealed closer.
- Low level integral DDA compliant threshold strip.
- All screws and fixings are fully concealed
- Can incorporate different types of glazing such as laminated, toughened or Georgian wired glass, polycarbonate or double glazed units.
- Silver anodised or powder coated finish.
- Manufactured from aluminium, which is fully recyclable.
- Standard guarantee period of two years.
