

Entrotec are specialist manufacturers of door entry systems with Equality Act 2010 (DDA) features. This legislation imposes a duty on landlords and management companies to ensure that people with disabilities are not disadvantaged at the point of entry to premises.

We provide Local Authorities, Housing Associations and New Development projects with a wide range of solutions in order to ensure door entry systems are Equality Act 2010 (DDA) compliant.

Standard English Braille (Grade II)

Entrotec can engrave standard English braille (grade II) on call panels to aid visually impaired users.

On functional panels with Pressure Sensitive Buttons braille can be engraved below the button with the number engraved on the button.

On functional panels with Vandal Resistant Buttons braille can be engraved below each button with the number engraved to the left.

On digital style panels buttons are laid out as a standard telephone keypad with number "5" incorporating a pimple.

Braille "Call" and "Cancel" buttons are fitted left and right of the "0" button.

Digital style panels can include an illuminated backlit digital keypad for enhanced visibility.

Braille instructions and block name are also available.

Call Buttons with Contrasting Yellow Ring

All Entrotec call buttons have a yellow contrasting ring engraved for enhanced visibility and to distinguish the stainless steel of the call buttons to that of the panel.

We can offer Pressure Sensitive Buttons and Vandal Resistant Buttons.

Pressure Sensitive Buttons (PSB's) have a large diameter and no moving parts. PSB's are fully tested to IP68 and tested to over 50,000,000 operations.

Vandal Resistant Buttons (VRB's) have a robust design offering added protection against vandalism yet still offer reliable tactile feedback of input.

Illuminated LCD Text Display

An illuminated LCD text message display is fitted to digital style call panels and functional where required.

This feature provides a clear visual indicator of call progress and system operation.

Interactive messages include:

Welcome message/Instructions, "Calling", "Speak Now", "Door Open", "System Busy"

Speaker Amp Grill

The speaker amp grill on our door panels provides distinct and clear two-way audio with a pictorial symbol to distinguish location.

Delivers an audio indication of calling with an adjustable volume controlled reassurance tone and a door open tone.

Voice annunciation of button presses and call progress also available.

Contrasting Proximity Reader

Entrotec have a range of proximity readers available each protected by a bright yellow polycarbonate lexan window to enhance contrast with the stainless steel of our door panels to aid visually impaired users.

Our proximity readers also include a raised tactile key symbol in order to distinguish its location.

DDA Door Entry Accessories

Entrotec can also supply a range of DDA system accessories in addition to our door panel features to complement your projects requirements.

All Entrotec handsets are DDA compliant with large pictorial symbols and buttons. Our handsets are available with hooks that aid users with disabilities to lift the handset and answer calls.

Panel Mount Cameras are available as well as dome cameras to provide a detailed view of full door entrance area for residents.

A beacon with an amber xenon strobe light to aid hearing impaired users and a sounder with integrated LED's for visually impaired users are available to indicate to a resident when a handset is ringing.

Our Push to Exit buttons include a yellow ring for DDA compliance and an illuminated LED button version is also available.

Induction Loops can be fitted above the door panel for use with a hearing aid switched to the "T" position allowing the visitor to hear amplified speech.

Handset Inductive Couplers are also available replacing a handset speaker for use with a hearing aid switched to the "T" position allowing the resident to hear amplified speech.
